

STERILIZATION & PROTECTIVE PROCEDURES

1. Disposable products are used wherever possible and discarded after each patient visit.
2. Handpieces and instruments are sterilized with high pressure & steam.
3. Protective plastic covers are changed for each patient.
4. Chairs & countertops are disinfected after each patient.
5. All our procedures are standardized by “Health & Safety Consultants, Inc.”
6. All procedures are reviewed and updated regularly according to regulatory compliance manuals.
7. Our patient’s safety is our first priority. Please ask us if you have any questions or concerns.
